

## Muslin, Extra Wide, FR

Heavy Weight, Extra Wide Muslin is used to make stage drops, cycloramas (cycs) or surrounds. Wide widths can be sewn into seamless drops, avoiding the horizontal lines that are hard to paint out of your design. Flame-retardant Muslin in white can be left unpainted. This muslin has shrunk a little in the processing, making sizing less of an issue. It can also be painted, but heavy paint treatments will require special techniques to prevent recrystallizing of the FR chemical salts.

Width	Weight per linear yard (in pounds)
12'	1.7
14'-5"	2.2
16'-5"	2.9
17'	3.25
21'	3.9
26'-8"	3.98
32'-9"	5
40'	6.2
