

Sharkstooth Scrim, FR

Open-weave 100% cotton net, commonly used for the "bleed-through" effect, giving the illusion of magically revealing items on a stage. It can be painted, sewn into a finished drop, or attached to a frame or scenery. The "tooth" of the scrim will normally be vertical, but the scrim will be just as effective if the tooth is horizontal. This allows a more effective use of the width of the scrim.

Width	Weight per linear yard (in pounds)
12'	.6
15'-6"	.78
19'-6"	1.01
25'	1.34
30'	1.64
35'	2.0
39'	2.22
